TRADITIONAL MEDIA

The Future of VIDEO

How Powerful is it?

Video Traffic Forecast

5 MILLION

It would take **1 person** more than 5 million years to watch the amount of video that will cross **global IP networks** every month in 2019.

80%

Consumer internet video traffic will be 80% of all **consumer internet traffic** across the world in 2019.

This will have increased by 16% compared to 2014 when **it was 64%.**

16%

Internet video to TV (e.g. Apple TV / Google Chromecast) will continue to grow at a rapid pace, having doubled in 2014. Its traffic will be **17%** of consumer internet video traffic by 2019.

17%

DOUBLE

Consumer video-on-demand **(VoD)** traffic will double by 2019.

70%

HD will be 70% of this.

8 BILLION

In the race for **social video supremacy, Facebook** is generating 8 billion video views daily & **Snapchat** is generating 6 billion. Time will tell what those figures could look like by 2019.

6 BILLION

KEY TAKEAWAY

Video will dominate the internet. It will be the primary medium for how internet users will consume information in the future & consumers will continue to demand high definition. Social media is a major driver of video distribution.

Consumer Attitudes to Video

More than **2 in 3 people** prefer to watch video to learn about a product or service given a choice between both video & text available on the same web page.

More than **3 in 4 people** say they have been convinced to buy a product or service by watching a video.

However, just over **3 in 5 people** say they have been put off buying a product after watching a bad explainer video.

More than **3 in 4 people** say they would share a branded video with their friends if it was entertaining.

Almost **2 in 3 people** say they would share a video if it was informative.

More than **1 in 2 people** say they would share a video if it was inspirational.

KEY TAKEAWAY

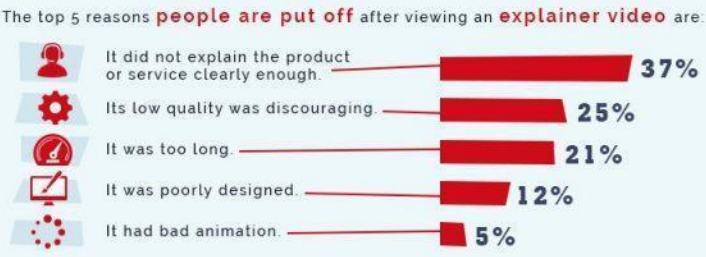

Consumers are becoming more sophisticated. Low quality explainer videos will undermine sales. For videos to connect with their target audience, they will need to be entertaining, informative & inspirational.

Video Marketing & the Impact on Brands

Video is seen as the **future of content marketing**. More than ½ of all companies are using video in their marketing strategies.

7 in 10 people view brands in a more **positive light** after watching interesting video content from them.

The top 5 reasons **people are put off** after viewing an **explainer video** are:

The number of **mobile phone video viewers** in the US is projected to reach **137 million** by 2019.

18 to 24 year olds spend **36 minutes** per week viewing **video content on smartphones**, the most of all age demographics & key for brands to focus on.

Video ad revenue will increase at a **3 year compound annual growth** rate of **19.5%** through 2016, according to Business Insider.

That is much faster than **traditional online display advertising**, which will only grow at a **3%** annual rate.

Video ads have an average **click-through rate** (CTR) of **1.84%**, the highest CTR of all digital ad formats.

KEY TAKEAWAY

Video will be key to effective marketing strategies & brands who do them well will increase brand engagement. Brands who switch from text based display advertising to video based advertising have the best chance of converting leads to sales – especially if done on mobile platforms.

What is **GERD**?

Gastro
Esophageal
Reflux
Disease

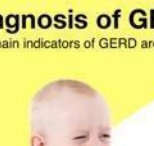

GERD in infants

Spitting up (GER or "reflux" - the backward flow of stomach contents up into the esophagus or the mouth) is normal in most infants as their immature digestive systems develop. It is self-resolving in almost all infants by 1 year of age. GERD is rare and more serious, and occurs when complications from GER arise, such as failure to gain weight, bleeding, respiratory problems or esophagitis.

Diagnosis of GERD:

Two main indicators of GERD are:

Spitting Up

"Up to 70% of infants spit up on a daily basis."
- Dr. Eric Hassall, Journal of Pediatrics, Vol.160, No. 2, February 2012

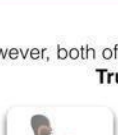

&

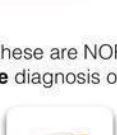

Crying

"All infants cry...the median duration of crying is 3 hours per day, and in 1/3 of healthy infants crying can exceed 3 hours per day."
- Dr. Richard Haber, Parkhurst Exchange, Vol.19, No.1, February 2011

However, both of these are NORMAL behaviors for most infants.
True diagnosis of GERD includes...

Endoscopy

Esophageal pH

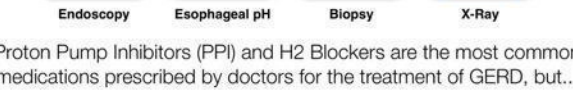

Biopsy

X-Ray

Proton Pump Inhibitors (PPI) and H2 Blockers are the most common medications prescribed by doctors for the treatment of GERD, but...

Fewer than 10% of the infants receiving had any diagnostic testing.

Journal Pediatric Gastroenterology and Nutrition, Vol. 45, No. 4, October 2007

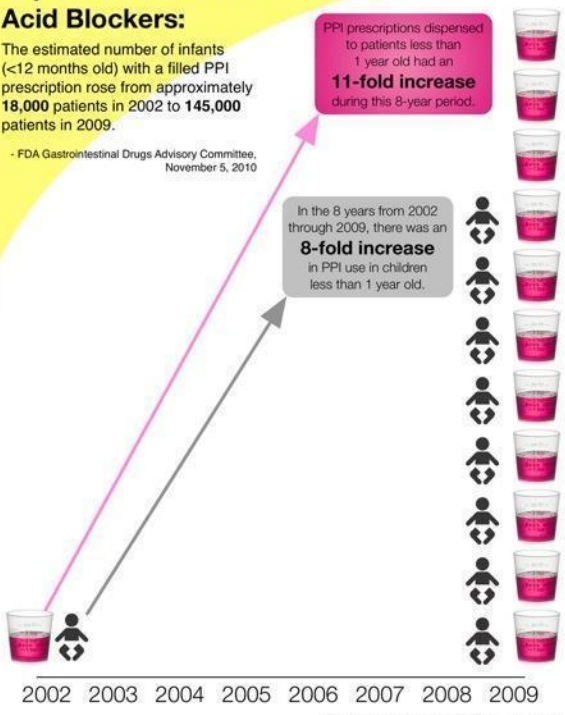

"Babies have been crying and spitting up since time immemorial. But these days many parents ask: Isn't there a drug for that? 'Parents often come in demanding medication,' says Eric Hassall, a pediatric gastroenterologist. Hassall says some parents have picked up on the idea that heavily advertised medicines for reflux in adults can help fussy babies who spit up a lot."

- "Second Thoughts on Medicines For Babies Who Spit Up", NPR, November 2011

Explosive Growth of Acid Blockers:

The estimated number of infants (<12 months old) with a filled PPI prescription rose from approximately **18,000** patients in 2002 to **145,000** patients in 2009.

- FDA Gastrointestinal Drugs Advisory Committee, November 5, 2010

FDA, Pediatric Focused Safety Review, June 2010
SDI, Vector One®: National, Data Extracted May 2010
SDI, Vector One®: Total Patient Tracker, Data Extracted May 2010

The results of four clinical trials show that these medicines work no better than a placebo in treating infants with reflux.

- The Journal of Pediatrics, October 20, 2011
- "Second Thoughts on Medicines For Babies Who Spit Up", NPR, November 2011

The FDA has NOT approved PPIs for children younger than one year.

So, What's the Harm?

Stomach acid is **essential** for proper absorption of nutrients. By suppressing stomach acid, acid blockers have a number of potential side effects, especially for infants. Here are the most common...

Short Term

- Headache
- Dizziness
- Drowsiness
- Runny Nose
- Dry Mouth
- Nausea
- Abdominal Pain
- Constipation
- Difficult Urination
- Diarrhea

Long Term

Acid blockers reduce absorption of key nutrients:

- **Vitamin B12** is key to normal brain development
- **Folic Acid** helps prevent defects in the brain and spine
- **Calcium** builds teeth and bones
- Insufficient production of the enzyme **Pepsin** can lead to food allergies
- **Zinc** supports healing and the immune system
- **Iron** aids formation of red blood cells
- **Magnesium** helps maintain normal muscle and nerve function

Increased Risk of Infection As part of the immune system, stomach acid protects infants from infection by killing harmful microbes and bacteria ingested with food.

REAL MONEY, VIRTUAL WALLETS

WHILE ONLY ABOUT 1 IN 3 AMERICANS EVEN KEEPS A HOUSEHOLD BUDGET, TIMES MAY BE CHANGING AS NEW TOOLS MAKE IT EASIER THAN EVER TO KEEP TRACK OF INCOME, BILLS, LOANS AND CREDIT CARDS. BUT ARE WE TOO SLOW TO EMBRACE THESE TOOLS?

OUR FINANCES ARE COMPLEX

$163 AVERAGE UTILITY bills per household

$1,061 AVERAGE MONTHLY mortgage payment

$290 AVERAGE MONTHLY student loan payment (standard 10-year repayment plan)

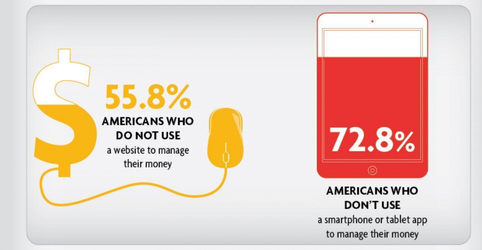

$428 AVERAGE MONTHLY payment for new car

$4,878 AVERAGE CREDIT CARD account balance per household

3.7 AVERAGE CREDIT CARDS per cardholder

LOTS OF HELP IS AVAILABLE — BUT MANY AREN'T USING IT

DOZENS OF SOFTWARE PROGRAMS AND EVEN FREE WEBSITES EXIST TO HELP KEEP TRACK OF INCOME, SPENDING AND SAVINGS. BUT MOST AMERICANS STILL AREN'T TAKING ADVANTAGE OF THE AVAILABLE TOOLS.

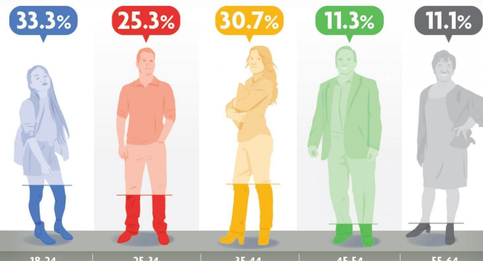

55.8% AMERICANS WHO DO NOT USE a website to manage their money

72.8% AMERICANS WHO DON'T USE a smartphone or tablet app to manage their money

Generation gap

FINANCIAL MANAGEMENT APP USAGE IS ABOUT THREE TIMES HIGHER FOR YOUNGER ADULTS THAN FOR OLDER GENERATIONS.

WHAT WE COULD BE USING

BEST MONEY MANAGEMENT APPS:

MINT
Cost: FREE
Special features: Link bank and credit card accounts; create budgets; spending notifications

SPENDEE
Cost: $1.99
Special features: See overview of all expenses; track income and expenses

BUDGT
Cost: $0.99
Special features: Track budget and/or income

CHECK
Cost: FREE
Special features: Track investmentsand credit scores

DOLLARBIRD
Cost: $1.99
Special features: Calendar view; track income and expenses

PAGEONCE
Cost: FREE
Special features: Track income and expenses

MINT
Cost: FREE
Special features: Link bank and credit card accounts; create budgets; spending notifications

EXPENSE MANAGER
Cost: FREE

IRELAND'S ENVIRONMENT

epa Environmental Protection Agency
An Ghníomhaireacht um Chaomhnú Comhshaoil

ENVIRONMENT & HEALTH

To maintain and benefit from a healthy environment requires coordinated efforts from many.

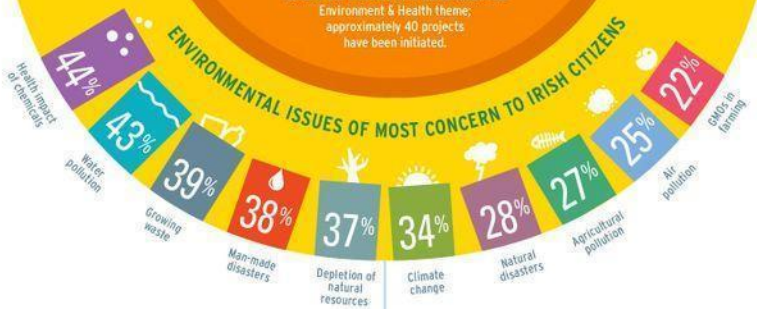

We established a 'Health Advisory Committee' in 2012 to further improve consideration of health and environmental activities. We deliver direct and indirect benefits to human health.

- Government and public bodies (including EPA, RPII, HSE, DoH, Institute of Public Health, Health Research Board)
- Small, medium and large-scale business
- Industry
- The farming community
- Controlling emissions from licensed facilities
- Supervising local authorities providing safe drinking water
- Monitoring ambient air quality
- Licensing release of GMOs
- Reporting on bathing water quality
- A significant funding programme for research

In Ireland, regulation of activities that pose a threat to human health and the environment is carried out by setting limits on all relevant emissions. This is designed to protect human health and the wider environment from unforeseen consequences of pollutants.

The EPA has invested over €8.5m under the Environment & Health theme; approximately 40 projects have been initiated.

ENVIRONMENTAL ISSUES OF MOST CONCERN TO IRISH CITIZENS

POLLUTION IN THE ENVIRONMENT CAN HARM HEALTH

The World Health Organisation estimates that environmental hazards are responsible for as much as a quarter of the total burden of disease worldwide and that as many as 13 million deaths could be prevented every year by improving environmental quality. The causes of most of these deaths are air pollution, poor water quality and insufficient sanitation. These risks to human health exist to a greater or lesser extent in all countries, including Ireland, as do risks posed by environmental chemicals, noise and waste.

Emerging issues with the potential to impact adversely on health should be kept under review. These include nanotechnology and electromagnetic radiation.

www.epa.ie/irelandsenvironment/

INTERSECTING TRENDS IN ADVANCED HIT

POPULATION HEALTH MANAGEMENT AND BUSINESS INTELLIGENCE

INITIATIVES MOST WORTHY OF PROVIDERS' ATTENTION IN 2014:

42% INTEGRATED CARE DELIVERY[1]

51% CARE COORDINATION[1]

56% POPULATION HEALTH MANAGEMENT[1]

WE'RE SEEING MORE INTEREST IN THE USE OF BUSINESS INTELLIGENCE TOOLS:

APPROXIMATELY **58%** OF HEALTHCARE ORGANIZATIONS HAVE NOT IMPLEMENTED A BI SYSTEM[2]

THIS INCLUDES...

36% who simply do not have a BI system

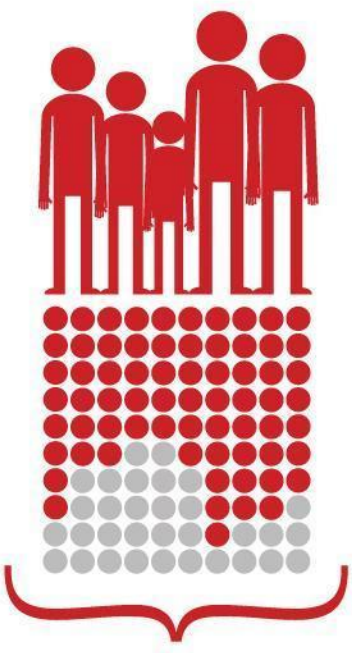

15% that do not have such a system but plan to implement one in the next 12–24 months

7% that actually have a BI system but have yet to implement it[2]

AND GREATER INTEREST IN ANALYTICS AS A WAY TO CAPTURE, MINE AND ANALYZE PATIENT DATA:

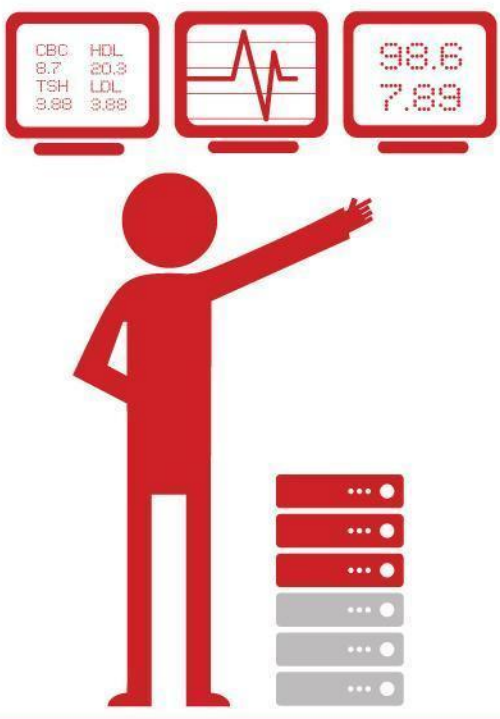

72.5%

OF ORGANIZATIONS ARE INTEGRATING CLINICAL AND CLAIMS DATA TO BETTER MANAGE POPULATION HEALTH[3]

A SYSTEMATIC WAY TO MAKE IMPROVEMENTS ACROSS THE ENTIRE CARE CONTINUUM:[3]

1. Identify how the care continuum functions and flows throughout the system.
2. Understand the correct use of evidence-based guidelines.
3. Collect and analyze the data.

MANY TOOLS CAN BE LEVERAGED TO IMPROVE DATA CAPTURE AND POPULATION CARE:[4]

1. Electronic health records
2. Patient registries
3. Health information exchange
4. Risk stratification
5. Automated outreach
6. Referral tracking
7. Patient portals
8. Telehealth/telemedicine
9. Remote patient monitoring
10. Advanced population analytics

Providers are making investments in the infrastructure necessary to better manage the health of the populations they serve, including investing in advanced HIT.[5]

Is your infrastructure ready? Do you need help shoring up storage to accommodate business analytics and population health management platforms? Contact the People Who Get IT.

  Controversial term in Ireland
- Great Britain
- Ireland (Island)

THE UNITED KINGDOM

Sovereign state

- The United Kingdom of Great Britain and Northern Ireland
  a.k.a. The United Kingdom (UK), Britain
- Ireland (Country)
  a.k.a. The Republic of Ireland, Éire
  NOT part of the UK

COUNTRIES OF THE UK

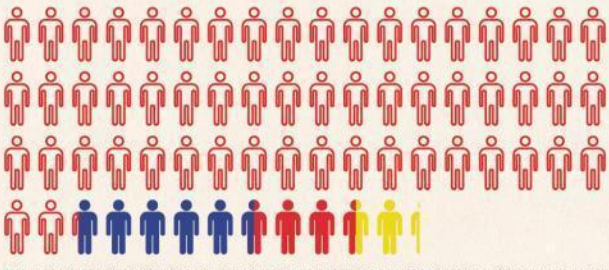

Not sovereign states
Have devolved governments*

- England
  * No devolved government
- Scotland
- Wales
- Northern Ireland

POPULATION OF THE UK

= 1 million British people (Britons)

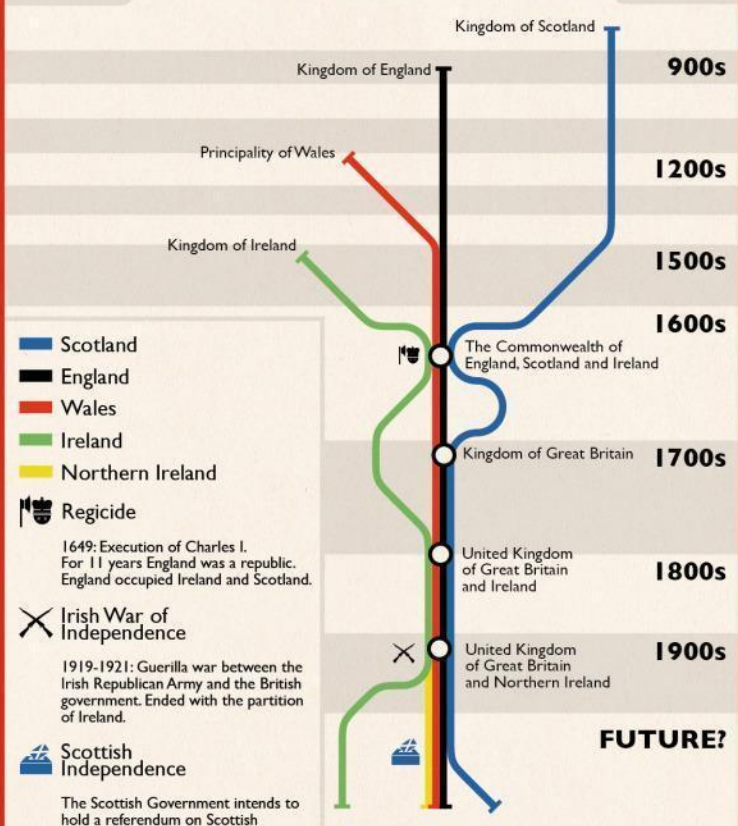

England Scotland Wales Northern Ireland

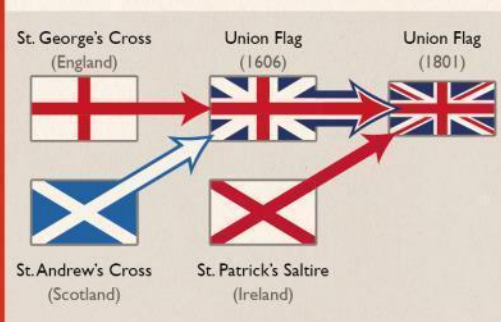

WARNING

Calling someone from Scotland, Wales or Northern Ireland "English" can be dangerous.

THE UNION

THE UNION FLAG

UNION FLAG OR UNION JACK?

Many people claim that the flag should only be called the "Union Jack" when flown from the bows of a warship. In 1902 the Royal Navy announced that either name could be used.

FRANCOIS DU PLESSIS

13

A fine batsman, a flexible and agile fielder and a handy leg-spinner, Francois "Faf" du Plessis has all the ingredients that go into the making of a modern day cricketer. Faf has the ability to score runs all around the wicket with an array of strokes including a sensational off-drive. On his test debut for South Africa, du Plessis helped his team salvage an epic draw. He batted for seven hours and faced 376 balls for an unbeaten 110, in a gritty defensive knock to ensure back-to-back draws between Australia and South Africa in a series for the first time since 1921. Faf du Plessis was appointed as the full-time captain of South Africa's T20 side in 2013.
