G. RESEARCH IN ANALYTICAL CHEMISTRY:

No. 2-21: Analytical chemistry methodology and its application to medical and nutritional research

No. 2- Development of new microtechniques and procedures for the evaluation of nutritional status

H. VITAMINS IN NUTRITION:

No. 2-26: Thiamine metabolism

S-1: An investigation of the biochemical changes induced in humans by a deficiency of thiamine

S-2: The chromatographic separation of N'-methylnicotinamide and thiamine (Final)

S-3: The use of the transketolase enzyme system as a criterion of thiamine adequacy in the chick (Final) — ? Jane in Brazil.

No. 2-29: Pyridoxine metabolism

S-1-3: The influence of pyridoxine deficiency on serum and tissue enzymes

S-4: Glycine metabolism in B_6 deficient rats

No. 2- Possible role of vitamin E in hematurias of unknown cause (Preliminary)
