**19%** of Healthcare Organizations use Pinterest

# How Can Social Media Improve Health Outcomes?

Use Social Media to Educate People on Complex Health Issues in an Unintrusive Way

Healthcare Organizations should use Social Media to Showcase their Patient Friendliness

The Social Web is a Great Motivator when it comes to Health Outcomes

Social Media Eliminates the Dependency on the Local Doctor and allows for Two-Way Communication Regardless of Geographical Location

Through Social Media, Patients Feel Empowered to Better Manage their Condition

Facilitates Exchange of Health Knowledge and Medical Experience

Health Organizations Should Coordinate Internally to Integrate Information from Social Media Space and Connect with their Customers to Provide Value and Increase Trust

There is Huge Potential for Health Companies to Connect with their Patients and Caregivers on Social Media by Posting Engaging Images and Videos

Health Related Companies can Help People Proactively Pursue Positive Health

Healthcare Companies can Gain Real-Time Information like Feedback by using Social Media to connect with their Patients and their Family

The Conversation does not have to End Once the Patient and Doctor Walk Out of the Room

Health Related Information on Social Media may Encourage People to Get a Second Opinion

Patients with Similar Conditions can Discuss Symptoms and Compare Treatments

Social Apps, Social Communities and Mobile Devices make Health Information Accessible to Anyone at Anytime

Health Industry Companies can take an Active, Engaged Role in Managing Individual's Health by Incorporating Business Strategies that Include Social Media

With the use of Social Media, Healthcare Advice and Knowledge can Reach Even to Remote Locations
