WHO RULES SOCIAL MEDIA?

A LOOK AT SOCIAL MEDIA IMPACT BY NONPROFIT ISSUES

PRESENTED BY CRAIG NEWMARK'S CRAIGCONNECTS

Animal	Children	Cultural	Disaster Relief	Environment	Health	Military / Vets	Women
The Humane Society of the United States	World Vision	Smithsonian Institution	American Society for the Prevention of Cruelty to Animals	The Nature Conservancy	American Cancer Society	Paralyzed Veterans of America	CARE
American Society for the Prevention of Cruelty to Animals (ASPCA)	United States Fund for UNICEF	Metropolitan Museum of Art	PetSmart Charities	The Conservation Fund	American Heart Association	United Service Organizations (USO)	Susan G. Komen for the Cure
MSPCA-Angell	Compassion International	The New York Public Library	National Disaster Search Dog Foundation	Conservation International	Susan G. Komen for the Cure	Help Hospitalized Veterans	Pathfinder International
Best Friends Animal Society	Save the Children	Metropolitan Opera	Habitat for Humanity International	Natural Resources Defense Council (NRDC)	The Leukemia & Lymphoma Society	Wounded Warrior Project	Hadassah, The Women's Zionist Organization of America
People for the Ethical Treatment of Animals (PETA)	Boys Town	Lincoln Center for the Performing Arts	American Red Cross	Environmental Defense Fund	Alzheimer's Association	Intrepid Museum	Planned Parenthood Mar Monte

Since hiring a full time social media person, ASPCA has seen tremendous growth over the past year: they have 75,000 Twitter followers (their following has doubled) and have surpassed 1 million Facebook fans by thousands.

The American Cancer Society "encourages and empowers all staff to be involved in social media in some form."

— Online Cancer Information Specialist

Wendy Harman from the American Red Cross explained their social media strategy. "We have subject matter experts within our lines of service devoting 30 minutes to 2 hours per day to social engagement in their area of expertise. We're also developing a cadre of digital volunteers to 'deploy' during disaster operations."

AND WHOSE WORDS ARE HAVING THE MOST IMPACT?

FOR THE RECORD

This infographic is a followup to **"How the Top 50 Nonprofits Do Social Media"** (craigconnects.org/infographic) released in October 2011. The top five nonprofits listed here in each category were ranked based on total expenses provided by Charity Navigator. Universities, hospitals, 501c4's and donor-advised funds are not included in the report. The numbers we have reported were rounded to the nearest whole number. During the week of October 26th we took these lists of the top five nonprofits and generated metrics to determine how different verticals were utilizing social media.

We analyzed the following metrics over a 2 month period ending 10/26/2011

- People "talking about this" via manual look-up on organizational Facebook Pages
- The number of staff involved in social media was gathered through emails and direct interviews with nonprofit staff at the relevant organizations
- Twitter mentions of other Twitter users by nonprofit organizational accounts via a manual count of historical tweet record on SnapBird.org
- Number of Facebook Posts via manual count on organizational Facebook Pages
- Number of Tweets via historical tweet record on SnapBird.org
- Twitter mentions of nonprofit organizations via Radian6 search

The number of staff involved in social media was gathered through emails and direct interviews with nonprofit staff at the relevant organizations. It was these metrics that led us to determine how the top nonprofits utilize social media, and whether social media impact varies by area of focus within the nonprofit sector. Animal organizations seem to top the metrics we tracked. However, it is noteworthy that all five of the top animal organizations employ professional staff to work at least part time on social media.

While it is interesting to see the variations in social media use by area of focus among nonprofits, the bottom line is that your priority should be to foster conversations, relationships, and interactions within your own community, whether it's 2,000 or 200,000 people. Work to move "your people" up the ladder of engagement. But know it will take an investment of staff time and resources to achieve this. These are the keys to keeping up in the fast-paced arena of social networks.

THE STATE OF Social Media 2012

What was once considered a trend has become a way of life—and now the way we do business.

JANUARY

Pinterest named **Best New Startup** of 2011

It referred **more business** than LinkedIn, Youtube, and Google +

President Obama holds first all-virtual interview with U.S. citizens using G+ Hangouts

Facebook Timeline was integrated with most of its users' profiles after its launch at the end of 2011

Anonymous attacks SOPA supporters with **LOIC** (Low Orbit Ion Cannon). This was their largest attack, with over 5,635 participants. Many were identified by their IP addresses and arrested.

FEBRUARY

Todd Wasserman of *Mashable* finds that the average person spends **3.3 minutes** on G+ compared to **7.5 hours** on Facebook per month

People's Republic of China takes advantage of lax G+ censorship and begin posting off-topic comments on **Barack Obama**'s official election campaign pages

MARCH

Facebook launched **Messenger for Windows**, giving Windows 7 users access to features without having to use a browser

Windows 7

KONY 2012

87,000,00? VIEWS

Kony 2012 is released and receives more than **87 million** online views. Stirs controversy over whether or not Uganda's warlord is even still alive.

APRIL

– Under New Mgmt. by – facebook.

Facebook buys Instagram for **$1 billion**

KONY 2012

Round 2

Kony 2012 follow-up video is released and receives half a million views on Youtube within a week.

Google+ shuts down its popular photo editing site, **Picnik**

picnik

See ya.

TIME

Time Magazine names **Anonymous Group** 'Most Influential Person'

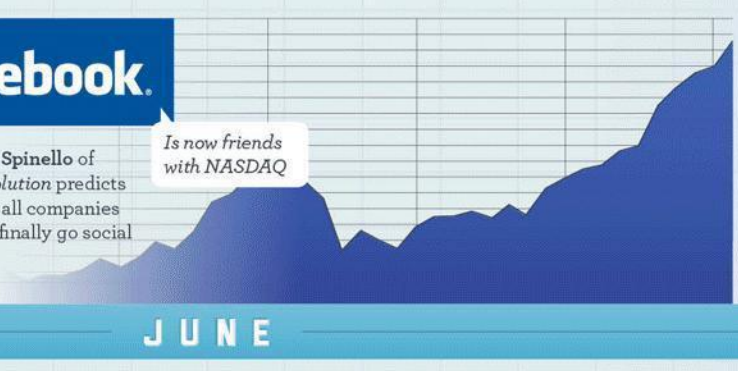

Facebook begins syncing email addresses and Timeline

MAY

Facebook IPO: opens at $38/share

facebook.

Is now friends with NASDAQ

Jim Spinello of *rEvolution* predicts that all companies will finally go social

JUNE

Simultaneously

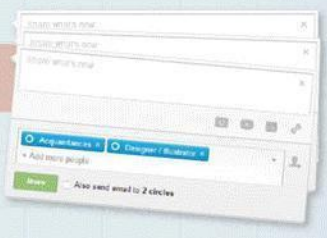

People *Tweet*

33%

People *Watch TV*

of active users *tweeted about TV.*

30% of users who make a public post on Google+ **never make a 2nd one.**

JULY

Users time on social media grew from 88 billion minutes to **121 billion minutes** in the U.S.

TMI? Nearly **a third** of people ages 18-24 connect to **social media from the bathroom.**

51% of people ages 25-34 connect from work.

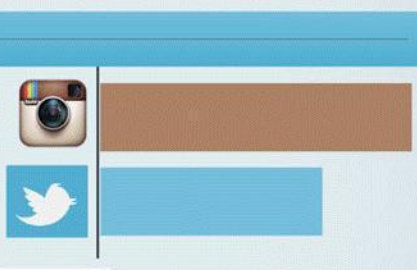

AUGUST

80% of Pinterest Pins have become **repins.**

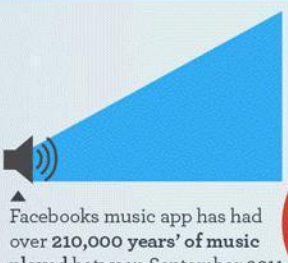

Instagram tops twitter for daily active users (DAU) for first time, 7.3 mil to 6.9 mil and reaches **80 million users** and counting.

President Obama's response to Clint Eastwood speech was the most RT'd tweet of the Republican National Convention

SEPTEMBER

Facebooks music app has had over **210,000 years' of music played** between September 2011 and September 11, 2012

At 12:45 pm PT, Facebook gained its **1 billionth member** (Would be 3rd largest country in the world)

As of September 10, Facebook had over **17 billion location-tagged posts**

LinkedIn gains **175,000 new members a day** as of September 2012

OCTOBER

facebook.

Facebook stock price fell to $21.83 as of October 3rd

Brazil became **largest active country** on Facebook (By posts/day)

NOVEMBER

"four more years."

Barack Obama's Victory Facebook post, was **most liked post ever** with over 4 million likes.

Instagram launches **web profiles** for its users

DECEMBER

Pope Benedict XVI **joins twitter** on Dec. 3rd

PSY "Gangnam style" is **most-watched video** in YouTube history with 1 billion views and counting

NOWSOURCING

THE **SOCIAL** SCREEN

Developing a Social Recruiting Strategy

Job seekers are already online perusing their options, utilizing their social connections, and reaching out to future employers. Top recruiters know that they must build a strategy around social recruiting to engage, entice, and connect with these quality candidates. Here are a few tips on how to begin.

WHY GO SOCIAL?

Social recruiting awards companies the opportunity to engage with a larger audience and to further spread brand awareness. Recruiters and companies not using social media will miss the chance to connect with qualified prospects.

64% of companies use two or more networks to connect with prospective employees.

The Explicit Benefits of Engaged Social Recruiting

- Connects you to the largest pool of active and passive job seekers.
- Encourages your employees to refer to their own networks.
- Sends authentic and multimedia messaging to your target audience.
- Lowers the cost of sourcing.

ESTABLISHING A STRATEGY

Your social strategy should effectively state the goals you are seeking to achieve. Identify your brand and recruitment needs prior to launching a social campaign and establish short-, mid- and long-term goals. Where do you envision your social recruiting in the next month, quarter, year and beyond?

Make a Statement

This statement should set the bar for what job seekers should expect from the company and vise versa.

Define and Display Culture

Identify your company's environment. Talk to existing employees about the current company culture. Then tell job seekers about it via social networks.

Understand Employee Interaction

Tailor your recruiting strategy to find candidates that will work well with the existing team of the company.

Weaving a Thread

Focus on the personality traits and skill sets of candidates you wish to recruit and find similarities between your candidates to retain the company culture.

EXECUTING THE STRATEGY

Now that key steps are in place, it's time to do the real work. For your recruiting efforts to pay off, your social communication needs to be consistent, timely, and pertinent.

Implement Employees

Your recruiting strategy should encourage existing employees to spread the word via their own social portals.

Content

Keep content relevant to potential hires at all times. 75 percent of your content should be on topics relating to your company, while 25 percent should be directly about your company.

Time Management

Allocate specific time to interact with your potential hires online and be realistic about what you can and cannot do.

Rating Success

Measuring the success of your posts and interactions can help you analyze which avenues are working and which need to be tweaked.

Social recruiting has the most potential to attract quality candidates. Social also gives prospective employees a glimpse into the company culture, environment, incentives, and opportunities. To keep up with today's savvy audience, recruiters must integrate social networking into their strategy.
